-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. Claims 1-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a.) Claims 1, 14, and 21 are vague. In line 1 of each claim, the recitation of "proximally associated" is not clear as to how the antigen is related to the test surface.

In response to this rejection, Applicants argue that the specification, specifically page 4, line 16, provides a clear definition of the meaning of the term "antigen proximally associated with..."

Applicants argument has been considered but is not convincing. While it is true that the claims must be read in light of the specification, it is still incumbent upon the claims to clearly set forth the claimed invention. The language in question in the preamble of each of these claims is simply not clear as to how the antigen is related to the test surface.

b.) Claim 12 is vague. While the claim is amended to recite detection of bound antigen with a reaction in which a chromogenic substance is converted to a chromophore, there is no clear relationship set forth between the bound antigen and chromogenic substance that permits detection of bound antigen. Does the chromogenic substance bind to the bound antigen?

c.) Claim 13 is vague. While the claim has been amended, there is still no positive step of providing a fluorophore that is contacted with bound antigen to permit detection of the antigen.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 5, 6, 10, 11, 12, 13, and 21-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Harte (US Patent 4,133,639) for the reasons of record.

In response to this rejection, Applicants argue that the “surface” in Harte is a dipstick that is in fixed relation to the handle and cannot be used as a roller. Applicants further argue that Harte fails to teach a solid test surface.

Applicants arguments have been considered but are not convincing. The instant claims recite the use of a “roller surface”. Harte shows a “roller surface” in the form of a cylinder or sphere attached to a handle. With respect to a solid test surface, the cylindrical or spherical body attached to the handle is a solid test surface.

***Conclusion***

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher L. Chin whose telephone number is (571) 272-0815. The examiner can normally be reached on Monday-Thursday.
